PROFESSIONAL SUMMARY

BSc CSIT student (Tribhuvan University, 6th Semester) with hands-on experience building and deploying full-stack web applications using React.js, JavaScript, Node.js, Express.js, and REST APIs. Built and shipped real-world projects — including an AI-powered document extraction system — across the full development cycle: responsive UI, backend API design, database integration, and cloud deployment on Netlify and Render. Comfortable with Git-based workflows, clean component-based architecture, and debugging across the stack. Continuously expanding into backend architecture and MongoDB. Looking to grow as a Software Engineer Intern or Junior Developer by contributing to production systems alongside experienced engineering teams.

TECHNICAL SKILLS

- **Programming Languages:** JavaScript, C, C++
- **Frontend:** HTML5, CSS3, React.js, Responsive Web Design, Flexbox, CSS Grid
- **Backend:** Node.js, Express.js, REST APIs, Authentication, CRUD Operations
- **Database:** MySQL, SQLite
- **Tools:** Git, GitHub, VS Code, Postman, Vite
- **Deployment:** Netlify, Render, GitHub Pages
- **Currently Learning:** Advanced React, Backend Architecture, API Design, Authentication, MongoDB

PROJECTS

AI-Based ID Information Extraction System

GitHub: github.com/dikeshsapkota/ID-Information-Extraction-System

- Designed and built an AI-powered full-stack web application that extracts structured data from identity documents, integrating Tesseract OCR to parse fields including Name, Citizenship Number, Date of Birth, and Address.
- Developed the React.js (Vite) frontend with responsive UI, loading states, and form validation, and built a Node.js/Express.js backend exposing secure REST APIs for document upload and data retrieval.
- Persisted extracted records in an SQLite database and configured environment-based secrets for secure, production-ready deployment — frontend on Netlify, backend on Render.
- Maintained clean architecture throughout: reusable React components, modular Express routes, and Git version control across the full project lifecycle.

Portfolio 2.0

GitHub: github.com/dikeshsapkota/Portfolio-2.0

- Built a fully responsive personal portfolio in React.js with reusable components, dark/light theme toggle, and smooth animations deployed on GitHub Pages.
- Applied mobile-first, component-based architecture and modern CSS techniques for cross-browser compatibility and consistent UI across devices.

Quiz App

GitHub: github.com/dikeshsapkota/Quiz-app

- Developed an interactive quiz application in vanilla JavaScript using DOM manipulation for dynamic question rendering, real-time score tracking, and a fully responsive layout.

My Travel Journal

GitHub: github.com/dikeshsapkota/MyTravelJournal

- Built a React application with reusable components, props-driven data flow, and state management to dynamically render travel entries across a responsive layout.

Student Login & Register Portal

GitHub: github.com/dikeshsapkota/Student-Login-Register-portal

- Implemented a full authentication system — login, registration, form validation, and CRUD operations — with database integration and session management.

EDUCATION

Bachelor of Science in Computer Science and Information Technology (BSc CSIT)

Vedas College, Tribhuvan University

Current Status: 6th Semester (Running)

Relevant coursework: Data Structures & Algorithms, Database Management Systems, Object-Oriented Programming, Software Engineering, Operating Systems, Computer Networks, Web Technologies, System Analysis and Design, Artificial Intelligence Fundamentals

Higher Secondary Education (+2 Science)

Siddhartha English Boarding Secondary School, Damak, Jhapa

Grade: A Grade

Secondary Education (SEE)

Chulachuli English Boarding Secondary School

GPA: 3.35

KEY STRENGTHS

- **Problem-Solving:** Strong analytical and logical thinking; comfortable debugging across the full stack
- **Code Quality:** Writes clean, maintainable, and well-structured code with attention to reusability and clarity
- **Adaptability:** Quick to learn new frameworks, tools, and workflows — independently and under guidance
- **Teamwork:** Collaborative and self-motivated; effective in both independent and team-based environments
- **Attention to Detail:** Thorough in UI responsiveness, API design, validation, and error handling

INTERESTS & HOBBIES

Software Engineering, Full Stack Development, Artificial Intelligence, Open Source Contributions, UI/UX Design, Chess, Football, Emerging Technologies
